الجابر للرافعات الثقيلة والتقليات ذمم Al Jaber Heavy Lift & Transport LLC

Mission Statement:-

To consistently provide our clients with safe, comprehensive, high quality heavy lifting and transportation services which meet world class standards.

Health, Safety & Environment:-

Health, safety and environmental concerns are our first priority. Therefore, we have developed our procedures and documentation to the highest international standards and we ensure that they are comprehensively applied to our projects.

Our health, safety & environmental policy provides that it is a primary and continuing priority in the conduct of our activities that we endeavour to protect the health and safety of everyone affected by these activities and we endeavour to limit the adverse effects on the physical environment in which our activities are carried out.

Therefore, in our efforts to set safety and environmental standards we:

- Provide and maintain a safe, healthy working environment in compliance with all local regulations and legislation, together with all appropriate international standards and regulations.
- Ensure that all items of plant, equipment and all substances used in our diverse operations are properly used, maintained and handled in a manner so as not to constitute a risk to persons or the environment.
- Ensure that all employees are informed of the operational and safety standards, practices, objectives and procedures and that we train them in the attitudes, skills and knowledge in order to achieve these requirements.
- Ensure that all employees are made aware of their own responsibilities towards themselves and others. We encourage them to adopt safe, healthy working practices at all times during the course of their employment.
- Establish feed back procedures and systems and encourage all personnel to participate in matters of health and safety.
- Carry out regular audits, inspections and surveys of all its sites and activities to ensure the compliance with and adherence to these standards and conditions.
- Make assessments of all prospective activities, new works, developments, acquisitions or modifications to ensure their compliance with these standards and requirements.

Training:-

Training is integral to the development of our safe, efficient and multi-skilled workforces and an essential element of our work philosophy. Our personnel are all trained and externally certified to appropriate levels which comply with international standards. This ensures that our teams are capable of handling expensive and delicate equipment and that they are fully aware of the consequences and impact on project schedules if not handled correctly.

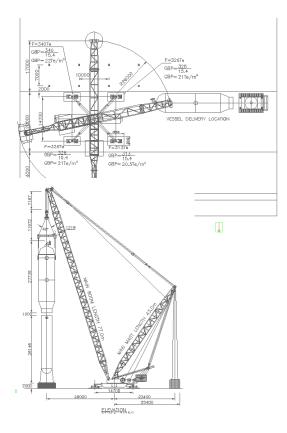

Cranes up to 3200 te capacity

Modular Trailers with capacities upto 40 te per axle line

Marine operations.

Weighing a 4015 te of rig hull "Thule Power" by means of 154 SPMT Hydraulic axle Lines and marine load out onto barge in the U.A.E

Erecting a 360 te demethanizer in Iran at 30m above ground level in Iran.

Our objective is to consistently provide our clients with safe, comprehensive, high quality heavy lifting and transportation services which meet world class standards. Therefore, we place great emphasis on understanding and supporting our clients through personal contact and assistance in the planning of our services to achieve the best possible solution and the most cost effective, safe handling of their goods. We believe that the successful implementation of our high professional standards largely depends upon our ability to anticipate even the smallest details in the operations.

Load out a 1700 te MED Unit in the U.A.E

Transporting a 270 te cryogenic exchanger using 24lines SPMT in Oman.

Quality Policy:-

Al Jaber Heavy Lift and Transport LLC is committed to providing professional contract heavy lifting, crane hire, heavy transporting and alternative lifting services to it's customers which meet world class standards. This is achieved through owning a well maintained fleet of cranes, vehicles and associated equipment, supported by a team of highly qualified, experienced and motivated staff whose expertise guarantees the quality of the services.

The company has an integrated quality system designed around the requirements of ISO 9001:2000 that ensures the needs and expectations of the customers are met. Within this system, Computer Aided Design is utilised to develop optimum equipment configurations and locations to safely meet the requirements of each contract on a timely basis.

Management and staff are committed to comply with and continually improve the effectiveness of the quality management system within the integrated framework for establishing and reviewing quality objectives.

Communication, both within the Company and with Customers, is vital for the delivery of any efficient service. This is given the highest priority by the management who train and develop the staff to international standards.

By concentrating on supplying a service of the highest quality Al Jaber Heavy Lift and Transport LLC has become an international leader in the provision of lifting and transportation services to the Petrochemical, Civil Engineering and Marine Industries. We intend to continually develop our service by responding to customer needs and proactively seeking ways to improve our quality system. We believe we are the best, but intend to become better.

Engineering:-

We believe engineering lies at the very heart of our business. When moving and erecting large and / or heavy objects there are numerous engineering constraints to overcome before determining the optimum solution. These are assessed by in depth engineering studies. Al Jaber Heavy Lift and Transport LLC provides all the necessary skills and expertise to engineer comprehensive packages which form the blueprints for the operations and contain all the necessary information to ensure that the work is conducted to the highest possible safety and quality standards. This evaluation process can be provided either as a separate consultancy service or as an integral part of our overall project execution services.
